Kinasang-an Pardo Cebu City

July, 2025

Dear Hiring Manager,

I am a Bachelor of Science in Computer Science graduate from the University of Cebu, graduating cum laude with consistent Dean's List recognition. With hands-on experience as a Full Stack Software Developer Intern, I have worked on responsive and scalable solutions using React.js, PHP (CodeIgniter), and various database technologies, while collaborating effectively in a team environment and applying best practices in the full software development lifecycle.

Beyond my internship, I have built machine learning projects such as a Philippine currency recognition model with accessibility features and a recipe recommendation app focused on nutrition and dietary needs. These projects, along with my involvement in leadership roles with the Computing Society of the Philippines Students, have strengthened my technical skills, adaptability, and commitment to delivering inclusive, user-centered solutions.

I am confident that my background and skill set make me a strong candidate for this internship. My eagerness to learn and implement new technology, combined with a career growth mentality, has prepared me for this position. Thank you for considering my application, and I would welcome the opportunity to discuss how I can support your team's goals.

Best Regards

Diane Sophia G. Fuentes
